Bar Stool

pera bar

Designer: Alp Nuhođlu Category: Bar Stool
Environment: Indoor Country of Production: Turkey

Product Details

Back and seat as one-piece construction is made of polyurethane foam injection molded over a metal frame which is supported by steel springs. This gives consistent shape quality and structural longevity.

Arm

Without Arm

Leg Alternatives

Height-Adjustable Barstool:

Ø63mm tubular metal profile is fixed to the Ø42cm flange base. For footrest, Ø12mm transmission metal profile is bent in U shape and fixed under the seating.

X Bar:

Ø16mm metal tube profile is bent and welded each other in order to make a base structure. Ø10mm transmission, X welded, metal profile is used for footrest. Plastic glides are available.

Sled Base:

Ø12mm transmission metal profiles are bent and welded each other in order to make a base structure. Plastic glides are available.

Ellipse Base:

Elliptic section aluminum profiles are welded in angular each other in order to make the base structure. Plastic glides are available.

Wood Base:

Beech or ash hardwood lathes are connected to each other by metal connector which is fixed both seat and leg. Ø12mm transmission metal profile frame is between the legs for footrest. Plastic glides are available.

Consultation:

Ø50mm tubular metal gas-lift is fixed to the 5-star office base. Height adjustment mechanism is fixed under the seating. Footrest, Ø12mm transmission metal profile, is bent in U shape and fixed under the seating.
