Even if the human interaction with the nature had evolved into an inconvenient routine, some details in space design are very important to keep this connection alive. Realizing these professional interior design solutions with natural patterns creates a cosy feeling both visually and spiritually for the ones who use that space.

With its armrests and back designed as a single structure, Alek invites you to a comfortable sitting experience. Cylindrical wooden legs which extend diagonally from the armrest level to the ground bring an aesthetical contrast to the oval formed backrest.

The warm feeling of wood that dominates the visual impact is unified with a smooth cushion seat. 70 mm thick cushion seat and the raw look of wood reinforce the feeling of comfort.

Finish Options

While the wooden frame of Alek chair / armchair can be produced with ash, walnut and black finishes presented in the B&T Design's solid wood catalogue, the seat and backrest can be customised with the rich collection of fabrics that has different textures and colours that would suit best with the characteristics of the space.

Solid Wood Options
